How to do a Retake Quiz

- ANYONE can retake a quiz
- If you got a NOT YET on your quiz you MUST complete a retake

Ok, I want to (or I have to) do a retake... how do I do it?

1. Come to tutorial (or elective) to go over mistakes and practice with your old quiz
2. Schedule a retake during tutorial or during lunch
3. Get your parent(s) to sign your quiz and bring it to the retake!
4. STUDY!
5. Take the full quiz again.

New: You get full credit back on your quiz, no averaging. Got a 54% on your first quiz and a 95% on your retake? Your grade is a 95%.

Quiz Corrections

Directions: In the boxes below, correct the problems you got wrong on your quiz. You must write the question and show your work. Do not just write the correct answer! Number the problems as you go.

- On the left side you solve the problem correctly (use notes, peer help, or tutorial).
- On the right, write at least one sentence of what your mistake was and how to fix it.
- If you got that problem correct, you will have nothing in that box.

Solve the problem correctly	What mistake did you make and how can you fix it?

Solve the problem correctly	What mistake did you make and how can you fix it?
